# KYRO

*Emotional scheduling that syncs your outer world to your inner world.*

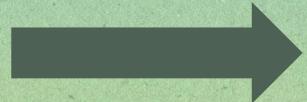

'Kyro' is a play on "kairos," the ancient Greek word for the right or opportune moment, hinting towards emotional timing and intuition.

It reflects our belief that emotional well-being isn't just about managing time, but about making time meaningful and aligning schedules with emotional balance.

# PROBLEM + SOLUTION

People overcommit and lose track of their own energy without understanding the cause, leading to burnout, confusion, and poor emotional balance.

Kyro helps users visualize, protect, and plan around their personal energy, not just time, to build healthier days and burn out less often.

*Primary Users: Adults between 25-44*

- highest users of scheduling tools
- Age group currently most susceptible to burnout

# **MARKET RESEARCH**

# Daylio

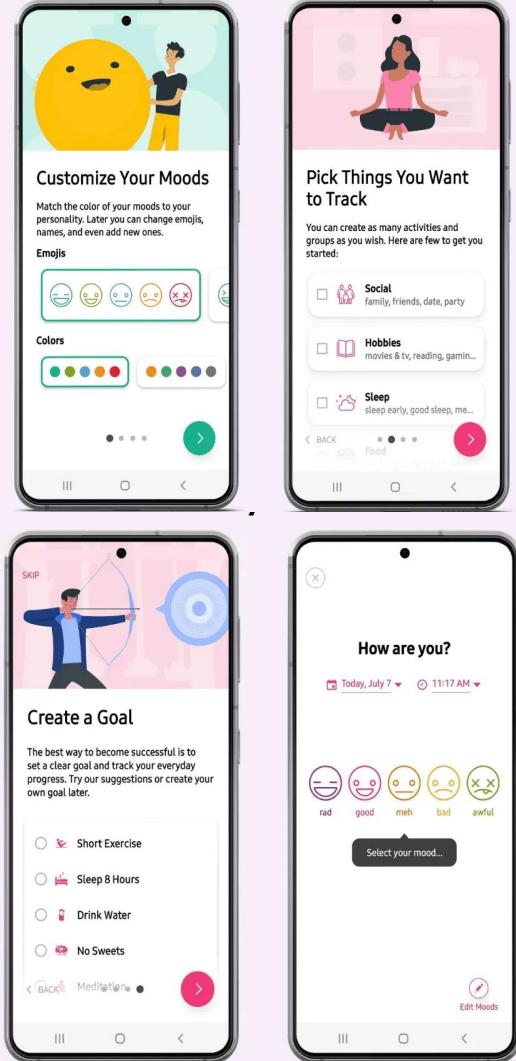

*"Keep a diary and capture your day without writing down a single word!"*

## What Works

- Event-Based Influence:** See how often something like “good sleep” or “fast food” influences your mood
- Quick Use:** <5 minutes to complete a journal entry

## What Doesn't

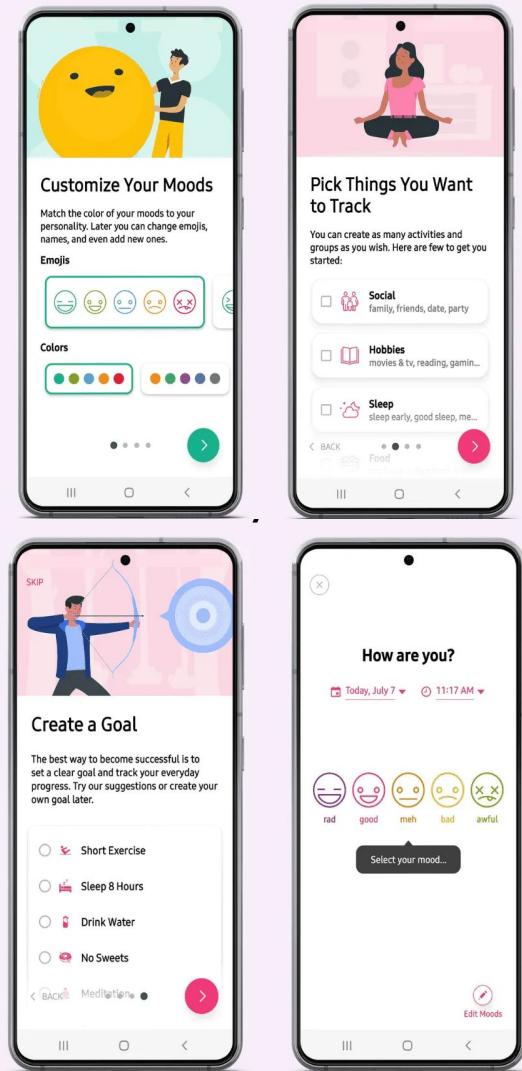

- No Written Reflection:** No journal prompts, very little writing involved
- Low Appeal:** May not be enjoyable for users who desire an interactive app

# Daylio

*"Keep a diary and capture your day without writing down a single word!"*

Kyro integrates Daylio's trends directly into calendar planning for smarter, emotionally-aligned time management.

# Moodistory

*"Your Mood Tracker App. For Self-Improvement.  
Keeping Your Privacy."*

## What Works

- Privacy-First Positioning:** “no cloud, no account, all on-device” model is popular with privacy-conscious users.
- Open Features:** No subscription, most features available after download

## What Doesn't

- Lack of AI / Smart Insights:** analytics are rule-based, not predictive.
- No social or community aspect:** limited long-term engagement loop.
- Financial Barrier:** Purchase required for download (\$4-\$6)

# Moodistory

*"Your Mood Tracker App. For Self-Improvement.  
Keeping Your Privacy."*

**Kyro can combine Moodistory's trust  
with adaptive intelligence,  
*translating voice reflections into  
schedule insights* without  
sacrificing data security.**

# Daily Bean

*"The simplest way to record your day."*

## What Works

- Simplicity:** Based on daily habits, routine, journaling, and photo prompts
- Categorical Customization:** more versatility to track a variety of activities and events
- Familiarity:** Reminders of what type of activities can be logged.

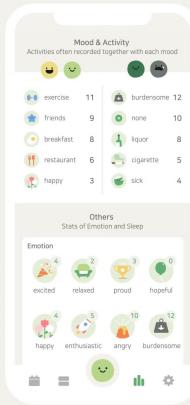

## What Doesn't

- Drop Off:** Documented user engagement decline over \_\_
- Financially Inaccessible:** No free version of the app
- Relies on Consistency:** Consistency of keeping up with filling out daily journals is more difficult.
- Privacy Concerns**

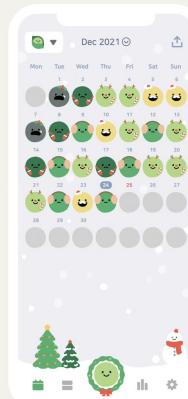

Keep Track of Mood Flow

Just Tap on Icons for  
Daily Record

# Moodflow

*"The ultimate journal, diary, and mood tracking app."*

## What Works

- Low-effort check-ins:** Quick daily entry keeps streaks alive.
- Customizable & private:** Users like color schemes and local-storage model.
- Affordable & ad-light:** Feels accessible, not exploitative.

## What Doesn't

- Data trust issues:** Lost-entry and backup complaints.
- Weak support & Android bugs:** Unreliable notifications, sync, crashes.
- Limited insights:** Mainly retrospective charts.
- Static experience:** Doesn't connect to calendars, habits, or scheduling tools.

# WHERE KYRO STANDS IN THE MARKET

## DIRECT STAKEHOLDERS

People who actively use or interact with Kyro:

- College students managing multiple commitments
- Working professionals balancing work/life energy
- Therapists or wellness coaches using insights to guide clients

## INDIRECT STAKEHOLDERS

People or systems affected by Kyro's use:

- Friends, classmates, and partners, benefit from better boundaries
- Universities / workplaces, improved productivity and wellbeing
- Health and wellness orgs, potential collaborators for mental health programs
- App stores & data platforms, responsible for maintaining privacy and uptime

*Kyro supports a healthy energy ecosystem, empowering users while protecting the networks around them*

# **ETHICAL IMPLICATIONS**

# Tarot Card #1: The Radio Star

*If Kyro wildly succeeds, people might eventually stop seeking therapists, life coaches, or peer support for everyday emotional guidance, relying instead on algorithmic empathy.*

## Potentially Overlooked Stakeholders

Those struggling with severe mental health issues could mistake Kyro's insights for clinical advice.

-> **Design Solution:** We will clearly communicate that Kyro should not replace professional mental health resources; it is merely a reflective, intervention-based tool.

THE  
RADIO STAR

## Ethical Implication

Users might self-diagnose or oversimplify emotions without professional guidance.

-> **Design Solution:** We will suggest professional resources when Kyro detects emotional distress patterns.

THE  
RADIO STAR

Who or what disappears if your product is successful?

Who loses their job?

What other products or services are replaced?

What industries, institutions or policies would be affected?

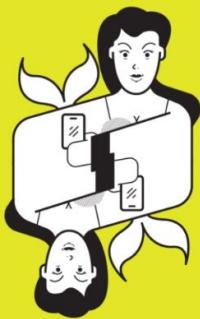

# Tarot Card #2: The Siren

*Overuse of Kyro could lead users to rely on the app to blindly validate their emotions instead of trusting their own intuition.*

**Underlying Value Tension: Mindfulness vs. Dependence**  
Kyro helps users reflect, but excessive tracking may turn emotional awareness into self-surveillance.

-> **Design Solution:** Add "take a break" nudges and gentle reminders to reflect offline

**Potentially Overlooked Stakeholders**  
Users prone to anxiety or perfectionism might feel pressured to "optimize" their emotions if they rely on validation from Kyro.

-> **Design Solution:** Avoid numerical "scores" or streaks that imply performance,  
include small in-app messages like "Ups and downs are normal" or "Feeling low today? That's part of being human."

## THE SIREN

◆  
**What would using your product "too much" look like?**

How does your product encourage users to engage, and how does it make it easy to disconnect?

How does your product respect people's boundaries and the other parts of their lives?

In what situations might it be inappropriate or distracting to use your product?

# Tarot Card #3: The Service Dog

*Kyro could meaningfully support neurodivergent users especially those with ADHD or autism by helping them understand emotional regulation and plan around energy patterns rather than rigid schedules.*

**Underlying Value Tension: Structure vs. Flexibility**  
Kyro provides organization and insight, but must avoid imposing neurotypical standards of productivity or emotional expression.

-> **Design Solution:** Let Kyro's reminders adapt to the user's behavior. If a user tends to log once a week instead of daily, the app learns that's their rhythm or asks when they'd like to be reminded.

THE  
SERVICE DOG

**Potentially Overlooked Stakeholders**  
Users with sensory sensitivities may feel overwhelmed by overly complex visuals or abstract analytics.

-> **Design Solution:** Build a neuro-inclusive mode with simplified visuals, low-stimulation color schemes, and optional voice-based interaction

## THE SERVICE DOG

If your product was entirely dedicated to empowering the lives of an underserved population, what kind of impact could you make?

Who could your product most directly benefit outside of your targeted users?

How would your product change to better serve them?

# **TASKS**

# RECOGNIZE YOUR ENERGY LEVEL

**TASK 1**

## SIMPLE TASK

User goal: Users becomes aware that their “cup” is empty, realizes they’ve overextended themselves and need to recharge (approaching burnout).

Why simple: It's an internal recognition moment that requires minimal user action, just reflection; all users will do this.

Scene in video: Main character notices her cup is empty and pauses for the first time

TIMESTAMP: 00:22 - 00:35

# RE-EVALUATE PLANNING DECISIONS WITH KYRO'S GUIDANCE

**TASK 2**

## MODERATE TASK

User goal: Users look to Kyro's cues for how to schedule their days intentionally.

Why moderate: It involves reflection and small but meaningful decision-making (setting boundaries). Only some users will pursue/act on these cues.

Scene in video: Kyro (glowing orb) guides main character through which events to accept, reject, and approach carefully.

TIMESTAMP: 00:43 - 01:13

FIND PATTERNS IN  
THE ACTIVITIES +  
PEOPLE THAT  
BRING JOY

TASK 3

## COMPLEX TASK

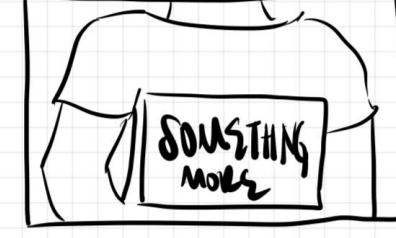

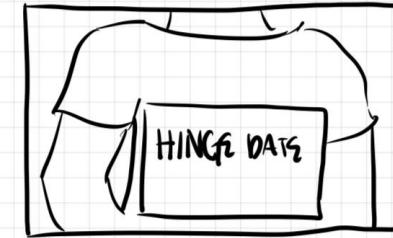

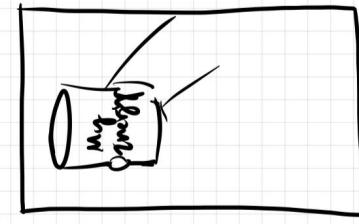

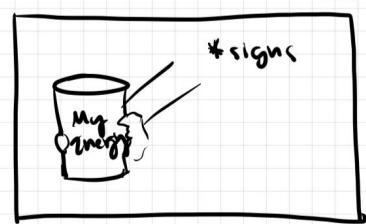

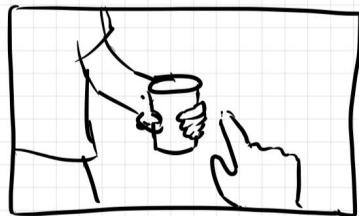

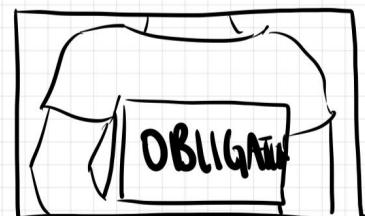

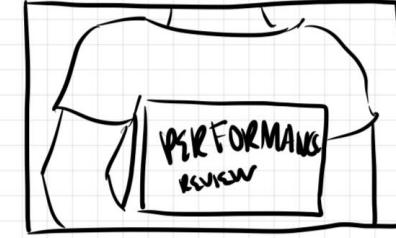

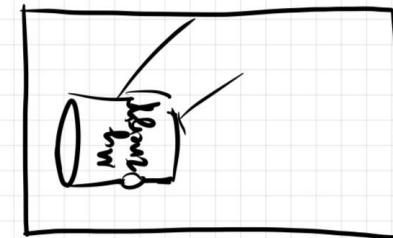

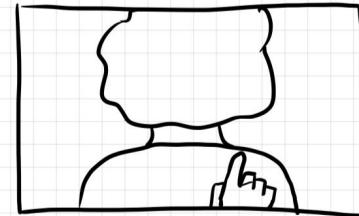

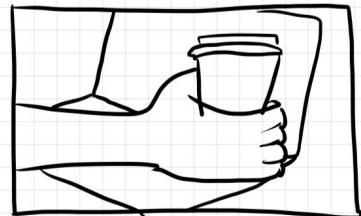

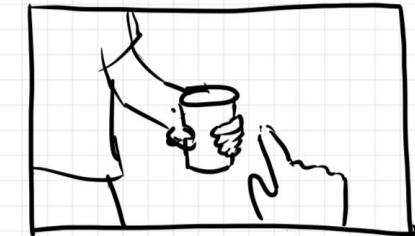

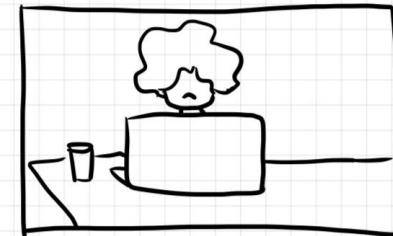

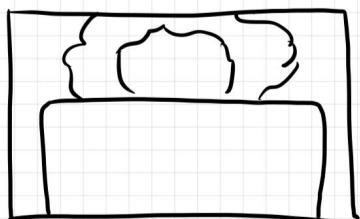

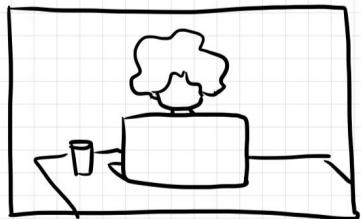

User goal: User ends the period of burnout by planning the day based on activities/people who replenish their energy, based on the trends recognized over time.

Why complex: This *optional feature* shows trends developed from data collected on the user after a long time (for accuracy). Only interested, long-term, consistent users will pursue these insights, and fewer will act on them.

Scene in video: Main character gains an insight on who she tends to have fun with and spends time with this person who adds to her energy instead of draining it.

TIMESTAMP: 01:14 - 01:28

# **STORYBOARDS**

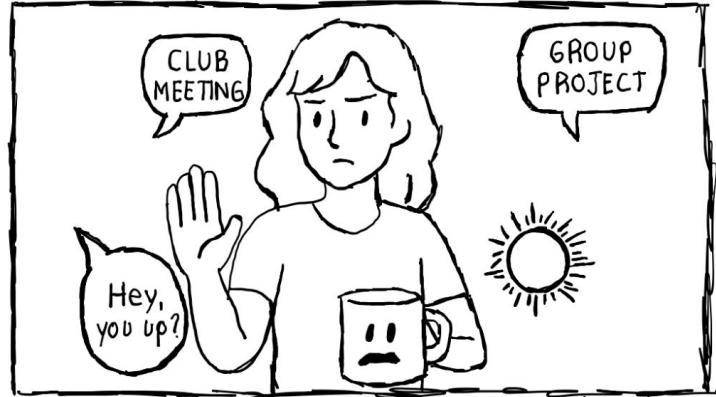

EXPOSITION

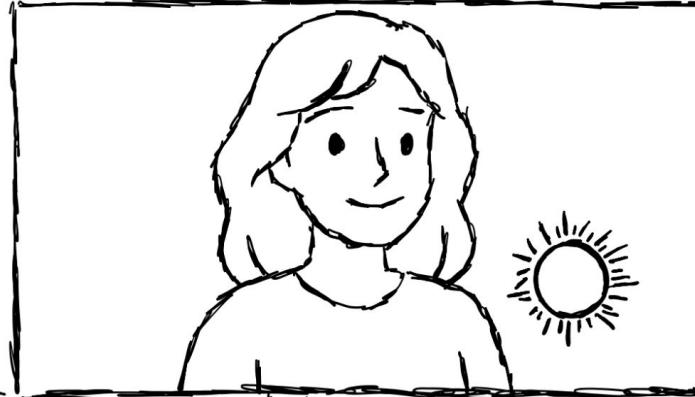

**CONFlict + CLIMAX**

# The Re-Do (With Karlo's Help)

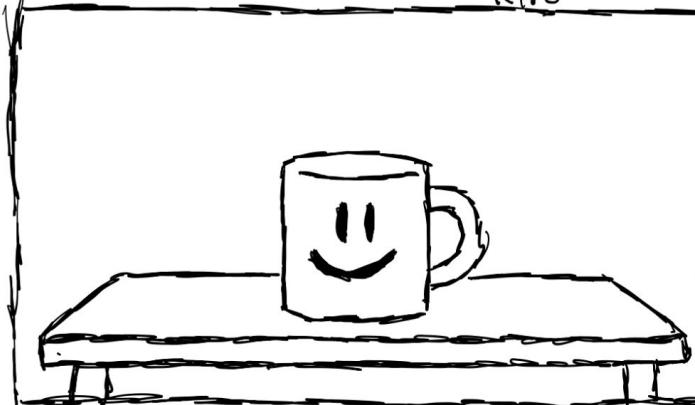

Chaotic (Medium shot) Emma invited to plans

(Close up) Emma consults Kyro

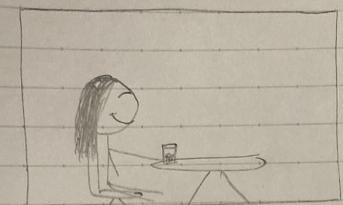

(Medium shot)  
Emma confidently says no  
to draining  
plans  
Setting boundaries

(Close up) Hero moment  
cup has restored energy  
Recharge

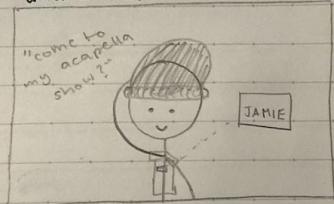

RESOLUTION

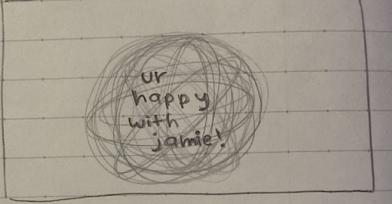

Kyro has helped make optimal planning decisions and Emma is now at peace.

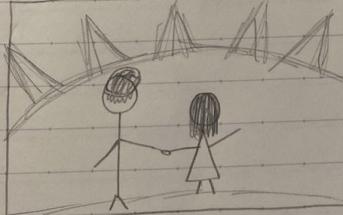

Emma is tapped on her shoulder again and dreads making another draining decision.

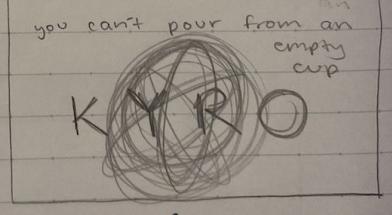

Instead, we're introduced to Jamie inviting Emma to a show that brings good energy.

Kyro affirms Emma's decision by sharing an emotion trend that she's happy with Jamie.

Jamie and Emma are happy and spend time together.

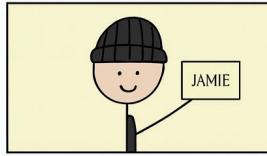

End scene features the Kyro logo and alludes to the empty cup metaphor.
